

# EnviroProjects Digital Initiative

*for practical environmental information solutions*

The overall aim of the Environmental Projects Digital Initiative (EPDI) is to enhance environmental awareness through improving online access and communication of environmental data and information.

EPDI implements practical web-based information systems and provides project management services for environmental projects and organisations.

<http://www.enviroprojects.org>

## EPDI's current service areas include:

- management of international environmental projects; and
- provision of Web-based environmental information/ knowledge management platforms including
  - (i) open source content management systems (based on Plone), and
  - (ii) geospatial applications (focusing on metadata catalogue/ geographic visualisation using GeoNetwork Opensource).

## Our projects & partners

Southeast Asia START Regional Centre

Okavango River Basin Water Commission

IRIACC/Coastal Cities at Risk

UNEP/GEF IWLEARN

Ramsar Secretariat

Thailand Greenhouse Gas Management Organization
